A Safety Guardrail for your Digital Press

Advantedge Technology® Adhesive-Free-Edge Die Cuts

Advantedge Technology Provides:

- Cleaner digital printing
- Reduced risk of adhesive ooze and buildup
- Improved sheet handling through equipment
- Less downtime for cleaning and maintenance
- Greater peace of mind for press operators

Not all label sheets are created equal. Our stock die cut products featuring Advantedge Technology are engineered with an innovative adhesive-free-edge design. This eliminates adhesive exposure around the perimeter of the sheet, avoiding transfer to rollers and print components.

Whether printing variable data, short runs, or everyday production jobs, Advantedge Technology helps support consistent press performance, cleaner equipment, reduced maintenance concerns, and reliable production output.

Request a printed sample from your sales representative

Stock 8½ x 11 die cuts are packed in 100 count recloseable boxes for easy storage
