

CLD-10 Adhesive:

For cold temperature applications

Cold temperature applications can be challenging. CLD-10 is an economical, hot melt rubber-based adhesive with good adhesion properties in light moisture and cold environments. This adhesive helps you to compete in demanding market situations, while providing good overall converting and performance.

Minimum application temperature: 10°F | Service range: -50°F to 130°F

Attributes include:

- robust performance in cold environments
- superior die cutting compared to other hot melt rubber-based adhesives
- excellent tack and adhesion to a broad range of cold surfaces

Applications/ Substrates:

- deli containers
- clam shells
- water bottles
- jugs & bottles
- plastic containers
- meat & cheese packaging
- paperboard
- packaging materials
- shrink wrap
- corrugate

We offer a variety of facestocks with CLD-10 adhesive for various applications. Call our Technical Consulting Hotline at 877.210.5104 or your Account Manager at 800.543.9452 for help.
