## Because Great Service Includes a Great Freight Policy

---

This industry-leading freight policy is designed to take the hassle out of figuring transportation cost on the labelstock you need. Compared to traditional pricing methods from other suppliers, we make it easier to stay on budget and protect margin. It's more than just a logistics advantage—it's a service commitment. Simplifying the process is one more way we deliver value and make your job a little easier, every step of the way.

\* Freight policy applies only to carriers assigned by Mactac/Spinnaker. Requests for specific carriers can be accommodated, but the freight policy outlined will no longer apply.

Upcharges for accessorial fees (liftgate, inside delivery, etc.) will be added to the invoice.
