

Seamless Rainbow Holographic

Roll Label

**Stronger
Together**

2.0 mil Seamless Rainbow Holographic Polypropylene is a holographic film that gives depth and visual interest to any label.

This eye-catching facestock is paired with SFA™ adhesive. SFA is a clear, general purpose, emulsion acrylic permanent adhesive specifically designed for applications with film facestocks. It exhibits excellent ultimate adhesion to polyethylene, polypropylene, and glass. It is also well suited for small, cylindrical labeling. This construction is available Precise™, where the minimum to purchase is only 1 slit roll, 3" width or wider.

Seamless Rainbow Holographic

Holographic Labelstock is for:

- Health and beauty products
- Kiddie stickers
- Craft beer and beverage labeling
- Retail packaging
- High impact label design
