

Vinyl offers durability

Vinyl often gets a bad rap because of the process and chemicals used to create the product.

Our vinyl is phthalate and cadmium free and passes CPSIA regulations. It is a more environmentally friendly alternative than some vinyl products currently available, which is a key attribute for end users.

Construction properties:

- 12-month outdoor life
- excellent tear, moisture, and chemical resistance
- high conformability and flexibility
- phthalate and cadmium free
- passes CPSIA regulations
- designed for printing in production and desktop laser printers
- 72# liner offers layflat properties

3.5 mil TC White Laser Vinyl / PRM-550 / 72# (45853)

This laser vinyl is paired with an aggressive emulsion acrylic adhesive appropriate for indoor and outdoor labeling.

3.5 mil TC White Laser Vinyl / RSM-92 / 72# (45854)

This removable adhesive option works well for temporary label needs.

Laser Vinyl Drum Label / PDL-09 / 72# (45115)

Stocked with a cold temperature emulsion acrylic permanent adhesive, the construction has excellent properties for drum labels. It has received BS5609 Part 2 approval.

Applications:

- bumper stickers
- point-of-sale displays
- window graphics
- indoor/outdoor signage
- indoor/outdoor labels
- chemical labels
- drum labels
- placards
- parking pass decals
- product ID labels
- shelves

Usage Tips:

- Consult your ink supplier when printing labels for outdoor use
- Strip an edge matrix for best results
- Follow standard layflat packaging and storage tips
- Ensure settings and paper path are considered, as laser printers vary in dwell times and temperature

Available Trimless with a minimum single roll order of 3" x 5,000'
